

2025 ROOF PROJECT UPDATE SHEET

Owners this sheet will periodically be updated throughout the duration of the roof project, to try and keep you as informed as possible!

s

s buildings are the roofline gutters.

Building 115

11

1/15/2025

Buildings 105 and 109 are now completed, the ONLY remaining task left to be done for these buildings is the installation of the roofline gutters.

Suncoast is currently in the process of removing the old roof and installing the new TPO roof on buildings 108 and 106.

I suspect once 108 and 106 are completed they will roll into buildings 103,104,115,116.

Message to Owners: Please remember that when they are working on your building you could be without a/c or heat for up to three (3) days!
